

Color By Number: Solving Two Step Equations

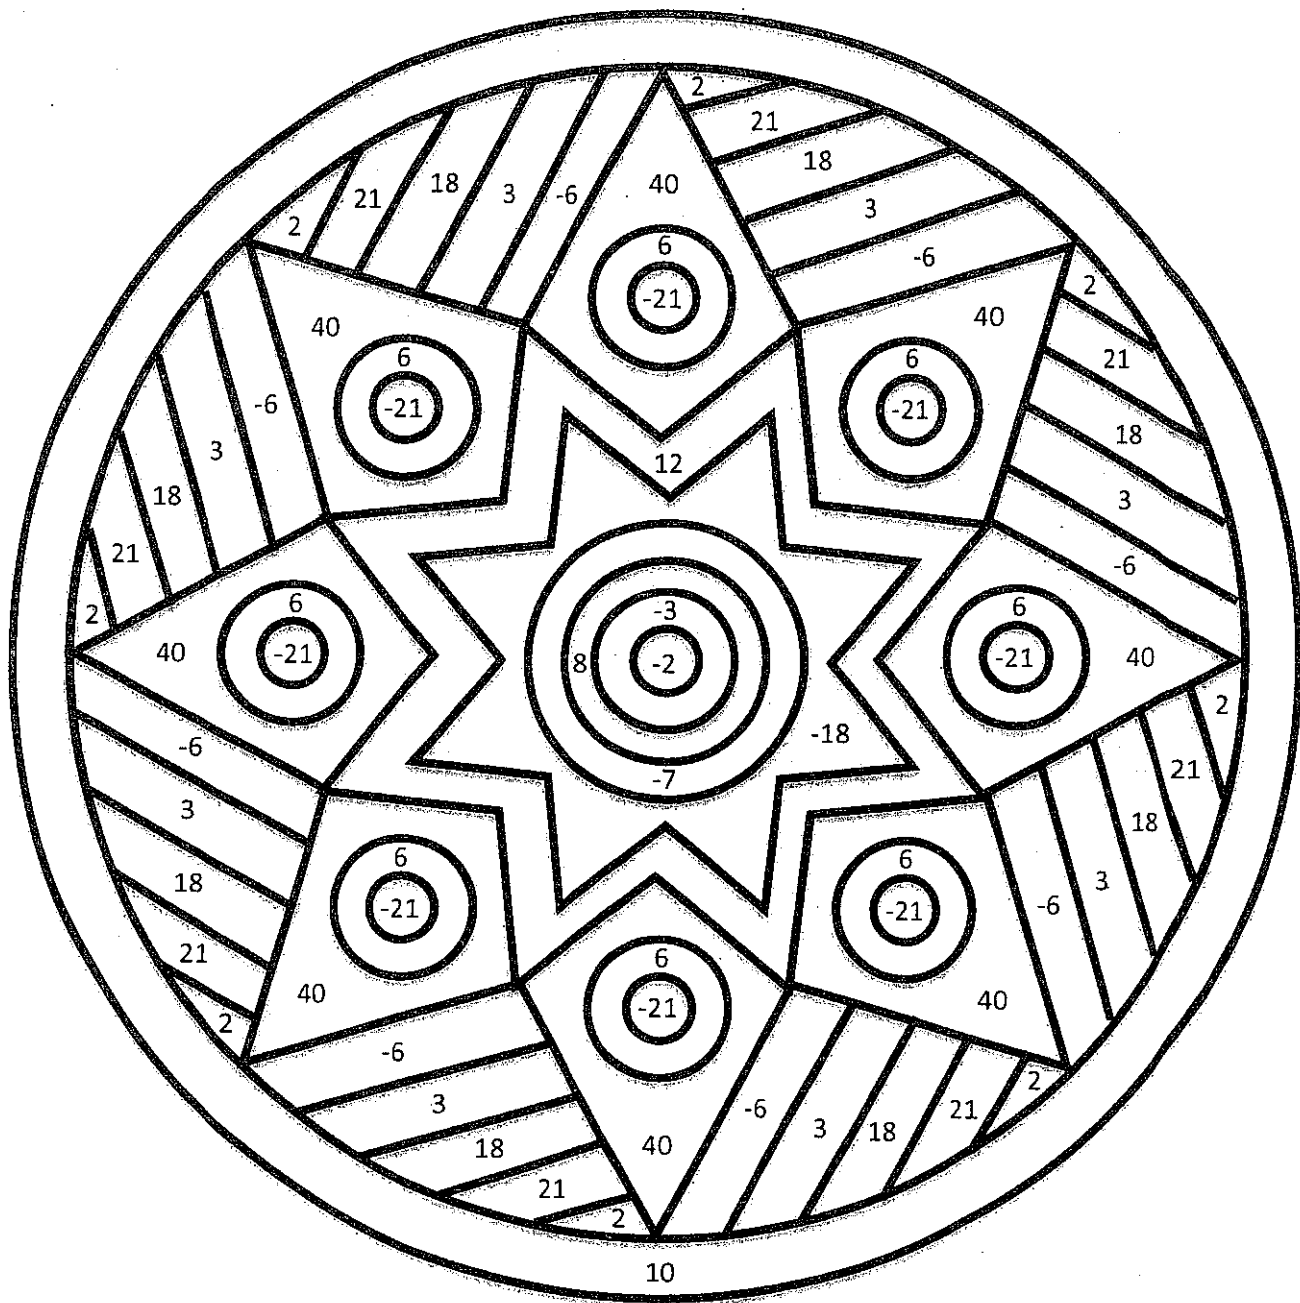

Name: _____

Solve each problem. Show all work clearly. Find each answer on the coloring page and color symmetrically according to the color code.

1	$-7x + 16 = 58$	2	$-2x + 15 = -9$	3	$5x - 4 = 36$
	Red		Green		Purple
4	$25 - 3x = 88$	5	$-11 = 7 - x$	6	$65 + 15x = 35$
	Orange		Pink		Yellow
7	$\frac{1}{2}x - 18 = 2$	8	$\frac{2}{3}x - 10 = -12$	9	$6 - \frac{1}{3}x = -1$
	Blue		Orange		Yellow
10	$4 - 9x = -14$	11	$11 - x = 29$	12	$-9 - 11x = 68$
	Orange		Red		Pink
13	$45 + \frac{5}{6}x = 50$	14	$-5x + 17 = -33$	15	$95 = -4 + 33x$
	Yellow		Green		Purple

Objective: Students will solve two step equations.

Activities by Jill 2013
